

**Course calendar description:**

*The principles of cellular and molecular biology using bacterial and eukaryotic examples.*

BIOL 112 is offered by Departments of Botany, Zoology and Microbiology & Immunology.

**Winter Session Registration**

Students must register for **one lecture section** and **one tutorial section**.

**Term 1 Lectures:**

Sec 101 = MWF (Mon/Wed/Fri) at 9 am – 9:50 am **IN-PERSON**

Sec 102 = MWF at 12 pm – 12:50 pm **IN-PERSON**

Sec 103 = TR (Tues/Thurs) at 8 am – 9:20 am **ONLINE**

Sec 104 = TR (Tues/Thurs) at 11 am – 12:20 pm. **IN-PERSON**

**Term 1 Tutorials Sections:**

There are 24 tutorials sections offered **ONLINE** [T01 – T24]

Student should register into ONE tutorial section that can fit into their schedule in Term 1 (same term as their lecture section). All tutorial sections will be held online at the scheduled time for both on campus and remote learning students. BIOL 112 Tutorials are graded and include activities that require online attendance and participation.

**Term 2:**

Sec 201 = MWF at 9 pm – 9:50 am **IN-PERSON**

Sec 202 = TR (Tues/Thurs) at 11 am – 12:20 pm **ONLINE**

**Term 2 Tutorials Sections:**

There are 12 tutorials sections offered **ONLINE** [T60 – T71]

Student should register into ONE tutorial section that can fit into their schedule in Term 2 (same term as their lecture section). All tutorial sections will be held online at the scheduled time for both on campus and remote learning students. BIOL 112 Tutorials are graded and include activities that require online attendance and participation.

**Summer Session**

Term 1 of summer session: May – June. Schedule will be posted in 2022.

**Prerequisites - BIOL 112 students are required to have a background in both Biology and Chemistry.**

Students need a minimum of BI 11 or higher AND Chem 12 or higher.

**Biology:** minimum Bi 11 (i.e. Bi 11 and/or Bi 12) or UBC BIOL 111 or equivalent  
**AND**

**Chemistry:** CHEM 12 or UBC CHEM 100, CHEM 111, CHEM 110 or equivalent.

Note: the chemistry prerequisite is strictly enforced.

**IMPORTANT NOTE: Prerequisite Warning**

The UBC registration system does not always recognize **all** prerequisites from **all** institutions. If a registration warning appears and has indicated you do not have the correct prerequisites **AND you do**, please proceed to register anyway. This is a warning and will not prevent you from following through on the registration.

IF you lack the appropriate prerequisites and register anyway, you may be de-registered later.

IF you are unsure if your course(s) satisfy the prerequisites, please email the course coordinator [karen.smith@ubc.ca](mailto:karen.smith@ubc.ca) ([link sends e-mail](#))([link sends e-mail](#)).

**It is the responsibility of each student to ensure they have the appropriate prerequisites.**

### Registration Seat/Space Availability

All seats (i.e. available spaces) in all sections of BIOL 112 are designated in one of 3 different categories:

**Restricted Seats** = these are “reserved” spaces for different groups of students.

We “**reserve**” spaces for students in specific degree programs and years. The reason we do this is to ensure that all students in all programs have an opportunity to register in the course.

**See this table** to help you interpret the descriptions. The online student service course schedule can be confusing when interpreting the Seat Summary.

<b>If you are a student:</b>	<b>Restricted Seats are described as in the online calendar:</b> <a href="https://courses.students.ubc.ca/cs/courseschedule?pname=subjarea&amp;tname=subj-course&amp;dept=BIOL&amp;course=112">https://courses.students.ubc.ca/cs/courseschedule?pname=subjarea&amp;tname=subj-course&amp;dept=BIOL&amp;course=112</a>
1 <sup>st</sup> year students in the Faculty of Science e.g. BSc degree programs	<i>in one of these programs: BSC in one of these faculties: SCIE in year: =1</i>
1 <sup>st</sup> year students in a faculty <b>other</b> than the Faculty of Science e.g. BSF, BSAG, BKIN, BSFN, BA etc	<i>not in any of these faculties: SCIE in year: =1</i>
2 <sup>nd</sup> year and above students in any faculty	<i>in year: &gt;=2</i>

- **Standard Timetable Seats**

These seats are designated for students who are registered in a specific program. If you are eligible for these seats, your program would have indicated so.

- **General Seats**

General seats **MAY** be available AFTER all the restricted seats are filled. General seats can be filled by any student regardless of year and/or faculty.

**Seats/spaces that are not taken by these categories will be released as general seats later in the summer after ALL students have their first opportunity to register!**

### What if the lecture section of your choice is full?

BIOL 112 has waitlists on the course registration for all sections.

Section	Waitlist for this section is named:
101	1W1
102	1W2
103	1W3
104	1W4
201	2W1
203	2W3
921 (summer)	92W

### Lecture Section of your choice is full?

**1. Register into the designated waitlist for that section.**

For example: students who want to get into section **101** in term 1, MWF at 9 am **MUST** register on the waitlist **1W1**.

Note: once you register into a waitlist, you are unable to register for another section of that course. If a seat becomes available in another section you are free to move your registration into that seat.

**2. Register into another section that may have space and can fit your timetable.**

You can keep checking over the summer to see if a seat in your preferred section becomes available later. In September, you can then see the coordinator, Karen Smith, to request a section change, if needed.

**3. All waitlists are full.**

Throughout the summer, students may be moved from the waitlisted section to that corresponding lecture section. Spaces on the waitlist may then become available.

**NOTE: The waitlist for each section does not guarantee a space.**

**EXMAMPLE: IF** you register in waitlist 1W3 you will be placed in lecture section 103 when a seat becomes available.

Students will **NOT be notified** if they have been placed in the section of their choice. Please check your registration periodically.

Please remove your name from the waitlist if you no longer wish to register in BIOL 112.

- Once you have been moved from the waitlist to a BIOL 112 section, you will be responsible for dropping the course if you no longer wish to remain in BIOL 112.

Please note the UBC calendar description:

*Some courses have wait list sections, which you can register in, if all regular sections are full. Students registered in a wait list section should check their registration regularly as some faculties may move students into a regular section as space becomes available without specifically notifying the student. Registration in a waitlist section does not guarantee a space in a regular section of the course.*

See Contacts below.

## Exemptions

All considerations for BIOL 112 exemptions must be forwarded to Karen Smith. Requests must be sent via e-mail [karen.smith@ubc.ca](mailto:karen.smith@ubc.ca)(link sends e-mail)(link sends e-mail) or in person (or by your Faculty advising office).

Note: Students may be asked to provide transcripts, course outlines and course notes. Students with experience in introductory microbiology and cell biology are potential candidates for exemptions. Courses that are exclusively eukaryotic cell biology, evolution and ecology usually do not qualify for an exemption.
